Nut M48, DIN 934, A2-70

ARTICLE NUMBER 1021845

We offer a variety of standard nut types for your needs. Our first option is the standard nuts, which are made of stainless steel AISI 304/A2, 1.4301. Their flat design makes them ideal for shorter threads. Another option we have is the counter nuts (DIN 439). Counter nuts are typically used in combination with a standard hexagon nut.

Technical specifications	
Drawing no.	NGI 178300
Material	A2-70
Net weight	972 g
Thread size	M48
Thread standard	Metric C
Type	Hex nut
