Sphere seal Ø62 - 1-1/4” - flat cover set of 25 pieces

ARTICLE NUMBER R950913

All according to use, we recommend replacing the spherical seal as needed, depending on local conditions and applications.

Our spherical seal is unique and patented and follows the shaft and bearing and waterproof even when misaligned at more than 3 degrees.

Even though our spherical seal has a longer lifetime than equivalent products, this is a wearing part and eventually this part will need to be changed.

Please note that our spherical seals are lubrication-free.

Technical specifications

Bearing house size	62 mm	2.44”
Thread size	None
